

Travellers Auto Barn launches new FREE car & campervan sales website for backpackers.

[Travellers Auto Barn](#), Australia's number one vehicle sales and rental company for backpackers and independent travellers has recently launched its brand new free listing car & campervan sales site for backpackers, [Cars 4 Backpackers](#) which it hopes will become the "go to" site for backpackers looking to buy or sell their vehicle in Australia.

The site targeted at backpackers but free to anyone will allow prospective buyers to search available vehicles well before they arrive in Australia, gather valuable information about buying and selling and connect existing owners with prospective buyers even before they have finished their big drive. [Travellers Auto Barn](#) managing director, Peter Burke was excited about the possibilities the site brings and looks forward to developing Cars4Backpackers (C4B) into a valuable tool for adventure minded self drive travellers coming to Australia.

"We've been developing the Cars 4 Backpackers for a quite some time now and it's been our plan from the start to not only get our own Travellers Auto Barn Campervans, Stationwagons and vans out there but to also develop a site where people planning a trip can start to get their head around buying and selling a vehicle in Australia. It's a confusing proposition at the best of times but can be particularly daunting for foreign travellers. Cars 4 Backpackers is designed to be used by the Travellers who has not yet even left their home country and are simply researching, to connecting buyers & sellers, right through to getting your car sold at the end of your trip. Cars 4 Backpackers will prove to be a useful resource every step of the way"

Mr Burke went on to say how the site had change and developed throughout the building process, adding that future developments may see the Cars 4 Backpackers become far bigger than just a free listing sales site.

"When we first sat down to map out ideas for the site it became apparent that with our years of experience and knowledge we would be able offer more than just a car sales listing site. We also wanted to add value for Travellers Auto Barn customers to provide existing Travellers Auto Barn customers with something extra that no other company or site could provide.

Travellers Auto Barn is famous for many things, the warranties and services they offer for one, but one of the most popular is the famous [Travellers Auto Barn buyback guarantee](#). Most Travellers Auto Bar customers would still like to sell their car at the end of their trip for more than the buyback price. Who wouldn't? We also realised that most people don't start the process of selling their car until they are at their final destination and they have limited time remaining.

The beauty of [Cars 4 Backpackers](#) is that from the moment the vehicle is bought it is listed, but not listed as for sale today. It's listed for sale at the buyer/owner's final destination in the month they expect to arrive and sell. Which could be Cairns 10 months from now. That's like a 10 month sales campaign!!! Users are free to update their listing & photos as often as they like.

This allows buyers to search for cars, vans, 4WD, campervans and Stationwagons weeks and months ahead of their arrival in Australia!!

Visitors to the site can see what cars are popular and get an idea of how much they might expect to pay for the car of their dreams.

The ultimate goal is to bring buyers and sellers together and simply promote the idea of buying a car in Australia

Naturally not everyone is comfortable buying a car off a backpacker that has just driven it around Australia and equally a bit cynical of many of the claims of private sellers and for those people there is a complete range of vehicles being offered by Travellers Auto Barn who continue to offer a very popular range of warranties and services:

- Nationwide Guaranteed Buyback
- 3 day 100% money back guarantee
- 2 week total warranty
- 5000 km Australia-wide engine and gearbox warranty
- Full mechanical inspection and service
- NRMA membership
- Aftersales 1800 support – 7 days a week

Travellers Auto Barn have been buying and selling vehicles in the backpacker industry since 1993 and look forward to the exciting growth and development of [Cars 4 Backpackers](#) into becoming the No.1 resource, Number One website in the Backpacker car and campervan sales market.
